MANUAL VALVES

Valves are a vital part of any piping system, which means that they play a key role control the flow in the oil, gas and petrochemical plant. We have been in contact with many valve manufacturers during the years of activities for many different types of applications, considering type of the valve, related manufacturing technology, materials and other specification. Arab Titans can supply you and your project valve a complete list of your inquiry with almost no technical deviation from manufacturer or available stock.

Manual Valves Types that we are supplying:

- Ball valve
- Gate valve
- Globe valve
- Butterfly valve
- Plug valve
- Needle valve
- Diaphragm or Membrane valve
- Knife valve
- Pinch valve
- Piston valve
- Solenoid valve
- Spool Valve

We are focused on valve industry in both direction of production and stockiest. We have the experience to provide a quotation by mixing of available stock and refer to production, considering your:

- Budgets
- Delivery time
- Technical requirements
- AVL (approved vendor list)

CONTROL VALVES

Considering that in general Control valves can be classified into two main types, based on the stem movement: Sliding and Rotary, and Apart from our experiences with manual valve, through dealing with control valves we have made stablished contacts with well-known actuators manufacturers. The majority of control valve manufacturers normally manufacturer the pneumatic actuators themselves and outsource the electrical actuator. We can supply your projects and inquires of different type of control valves by referring to the right manufacturers in order to meet your technical / commercial demands.

Control Valves Types that we are supplying:

- **Sliding Stem**
